Marking Report Summary

Mathematical Skills Examination

Grade 12

June 2024

Introduction

In the mathematical skills examination, students have 120 minutes to answer 30 multiple-choice questions in a separate answer sheet.

Each text includes a catalytic question, followed by four options, one of which is the correct answer. Each question measures one specific skill within the following main areas:

Dealing with Data

- Extracting and processing data
- Identifying similar data
- Choosing and working with models

Dealing with Problems

- Finding procedures for solving problems
- Searching for solutions
- Making choices and decisions

Performance Summary

Positive Areas

- Extracting and processing data.

Areas for Improvement

- Identifying similar data.
- Choosing and working with models.
- Finding procedures for solving problems.
- Searching for solutions.
- Making choices and decisions.

Recommendations

- Developing students' ability to deal with problems and their use of this ability in life situations.
- Training students on questions measuring the ability to choose and use models.
- Training students on how to find the right solutions to various situations in the best ways .
- Developing students' ability to look for solutions and make choices and decisions.
