Governance

Review Summary

- The school is a pleasant educational environment that stimulates students' learning and continuously enhances their psychological comfort.
- The school's leadership has a good awareness of schoolwork and a clear ability to face challenges, especially those related to the increasing number of students. It continuously seeks to engage parents in various school activities.
- The students show positive behaviour, confident and have leadership qualities. They participate in various extra-curricular activities, events, and competitions that meet their different talents and interests.
- Teachers use effective teaching strategies and resources in most lessons, especially science lessons, which enabled students to achieve good academic standards.
- The school needs to further focus its efforts on supporting the low achieving students in lessons and remedial programmes to develop their basic skills, especially in Arabic and English.
- The school needs to monitor the impact of professional development programmes on the performance of some teachers, particularly those related to utilising learning time and challenging students' abilities in lessons and written work.
- All of this means that students will continue to grow and develop, and the school will draft an Action Plan based on the review recommendations.
